INTERACTIVE SESSIONS FOR CLASS I CHILDREN

It is a special way introduced in KVS that teachers divide the children in different groups and interact with them in one to one basis. And every day the teacher interacts about 5 children. She takes the information given by the parent as well as the student. Here the teacher gets the opportunity to know the basic knowledge of the child and records about his capability. This will help her to judge the child in which level he/ she is.

Most of the parents also do come to know when the child answers to the questions asked by the teacher how his child is able to follow the communication or not. Almost 10 days teachers work out to know about each child.

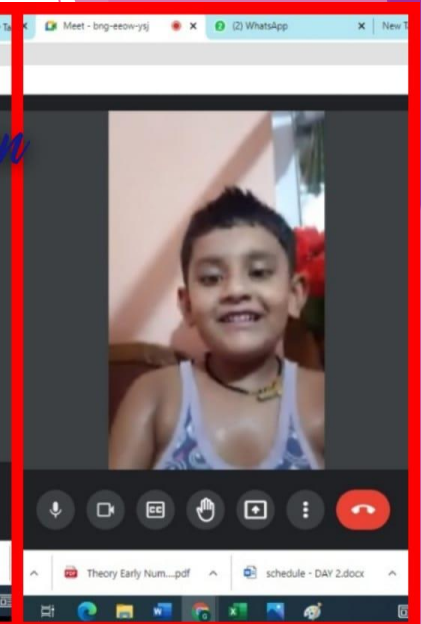

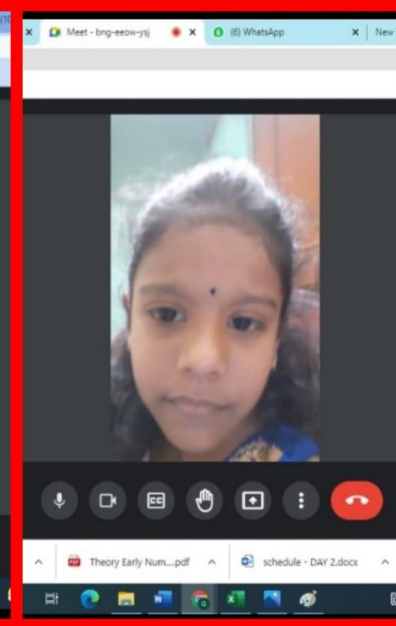

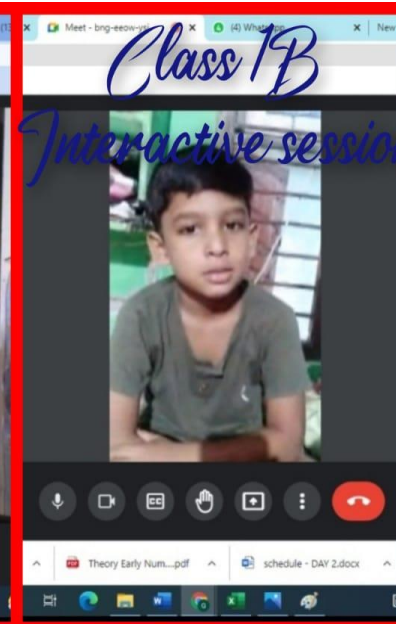

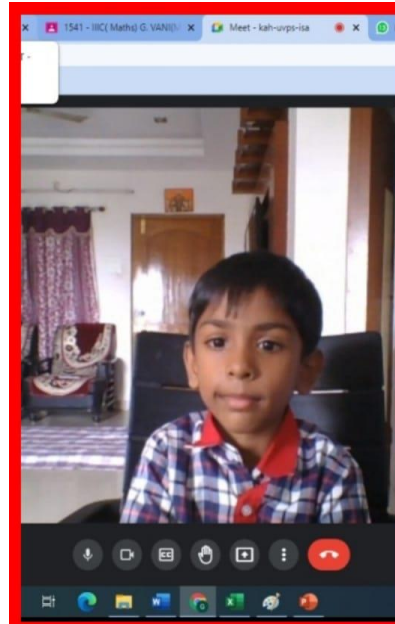

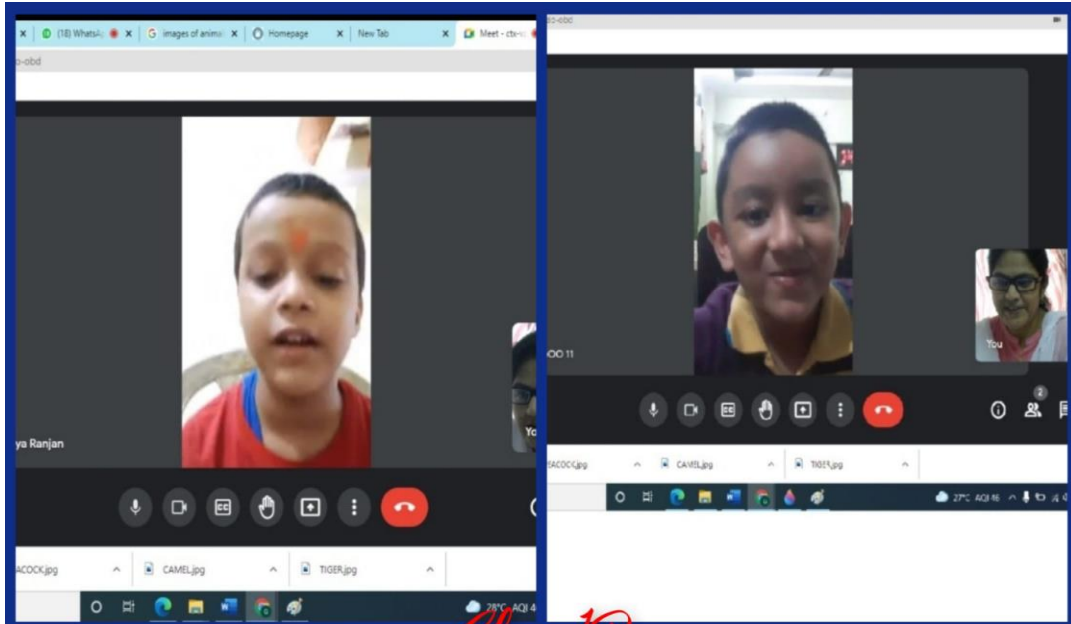

Every session in class I will be handled by two teachers with two subjects each. Both the teachers thoroughly interact with them and know how to handle them in regular classes.
